This exceptional offering features a combined cadastral surface area of 27 m², thoughtfully allocated to a spacious parking spot and an adjacent, highly practical storage room. Both these indispensable facilities are strategically located together on level -1 of a modern, well-maintained building, ensuring maximum accessibility and security for residents and investors alike. This consolidated arrangement is a rare find, providing seamless integration of vehicle security and personal storage needs within a single, convenient footprint.

The Ultimate Parking Solution

The designated parking space has been meticulously designed to accommodate a large vehicle with ease, a critical advantage in an area where parking can often be at a premium. Its generous dimensions ensure that even SUVs or luxury sedans can be parked and maneuvered comfortably, eliminating the daily frustrations often associated with urban parking. This isn't just a space; it's a secure haven for your valuable automobile, protected within a controlled environment that offers both safety and shelter from the elements. The thoughtful design ensures ample room, providing an effortless parking experience every time you return home or venture out.

Adjacent, Practical Storage

Complementing the parking space is a perfectly positioned storage room, situated immediately adjacent. This convenient proximity transforms the offering into a truly comprehensive solution for urban living. Imagine the possibilities: a dedicated area to securely store seasonal sporting equipment, bulky beach accessories, valuable household items that might otherwise clutter your living space, or even business archives, all without encroaching on your luxurious residence. This practical additional storage space is a significant asset, contributing immensely to a clutter-free and organized lifestyle, a hallmark of sophisticated living. It offers an invaluable extension to your home, providing the flexibility and capacity to manage your belongings with unparalleled ease.

State-of-the-Art Garage Facilities

The entire garage facility benefits from advanced security and access systems designed for convenience and peace of mind. Entry is seamlessly managed via an automatic door, operable with a personal remote control, ensuring exclusive and swift access for authorized users. To further optimize traffic flow and safety within the facility, the garage boasts separate entrance and exit points, reducing congestion and enhancing the overall user experience during peak times. Within the garage, the internal circulation is a model of simplicity and linearity, making navigation effortless and stress-free. Parking spaces are intelligently distributed on both sides of the main driveway, ensuring clear pathways and easy access to each individual spot, thereby minimizing potential maneuvers.

Adding another layer of convenience and luxury, the building features modern lift access directly from the garage level. This thoughtful inclusion means residents can transition from their vehicle and stored items directly to their apartments or building exits without having to navigate stairs or exterior routes. This represents a testament to the building's commitment to comfort, accessibility, and an elevated standard of living, ensuring that every aspect of your arrival and departure is as smooth and effortless as possible.
